

The most powerful
Authoring Tool
& eContent Development Platform

mAuthor is a combination of a powerful Authoring Tool and a cloud-based eDevelopment Platform dedicated to building highly interactive digital content and coordinating the workflow of the project teams involved in its creation. It is ideally suited to organize the development teams' work and assign different tasks to different roles, including authors, instructional designers, editors, graphic designers, reviewers, or testers.

The eContent developed with mAuthor is built along the eLearning industry standards and supports all desktop and mobile devices, making it perfect for modern technology-driven education.

eLEARNING STANDARDS

Resulting eContent is HTML5, SCORM 1.2, SCORM 2004 and xAPI (Tin Can) compliant, making it compatible with the majority of LMS platforms.

ONLINE & OFFLINE

Created eContent can be accessed online via an internet browser or exported to run off-line on desktop or mobile devices.

OPEN ARCHITECTURE

Thanks to open XML data formats, the open source code HTML5 player, dedicated API and java-based scripts, it is possible to expand the functionality of existing modules or to create the new ones.

POWERFUL ACTIVITIES

Over 150 ready-made, highly parametrized functional modules & activity types supporting a wide spectrum of modern education needs.

ACCESSIBILITY WCAG 2.1

mAuthor is the first authoring tool capable to create highly interactive, yet truly accessible eContent – supporting the WCAG 2.1 recommendations.

ADAPTIVE LEARNING

A vast selection of reporting and feedback capabilities enables the creation of highly adaptive content that adjusts to the learner's actual abilities.

WYSIWYG DESIGNING

Visual content development and editing mode – What You See Is What You Get – makes the designing work quick and accurate.

OS AGNOSTIC

Created digital content runs smoothly on Windows, Mac OS and Linux operating systems as well as in iOS or Android driven environments.

E-PUBLISHING ENVIRONMENT

Organize the workflow and smooth cooperation of project team members bearing different roles in the content development process.

MASS CONTENT DEVELOPMENT

Create your own library of visual and functional templates to support massive production of electronic content while keeping it reliable and consistent.

MOBILE READY

The eContent is driven by mAuthor's HTML5 based Player making it perfectly accessible from most mobile devices with various screen resolutions.

RAPID CONTENT DEVELOPMENT

Large number of flexible templates, ready-made modules and pre-defined activities make it a perfect solution to create large scale projects with tight timeframes.

UNDER CONTROL

Secure full support for digital publishing processes, including Version Control, Bug-track or Kanban methodology.

TECH SUPPORT

Our experienced team is always ready to help you achieving your goals and solving any problems you may encounter.

CONTINUOUS DEVELOPMENT

mAuthor is regularly updated with extra features, new modules & activities making it always at the edge of arising technologies.

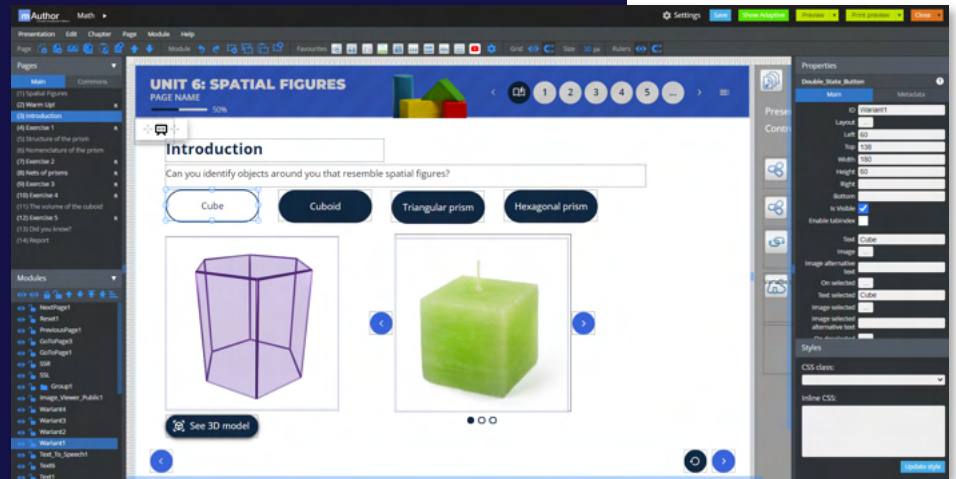

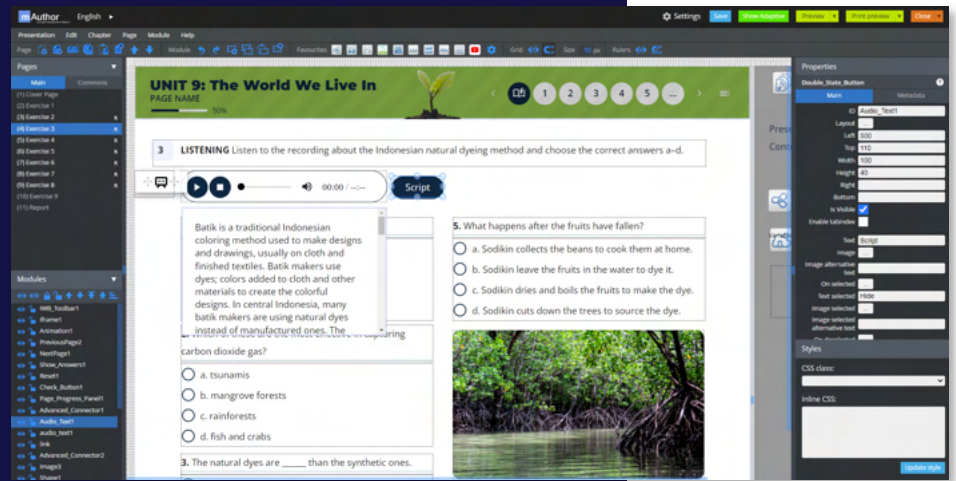

Professionals
need
Professional
Solutions

The most
powerful
Authoring
Tool
ever

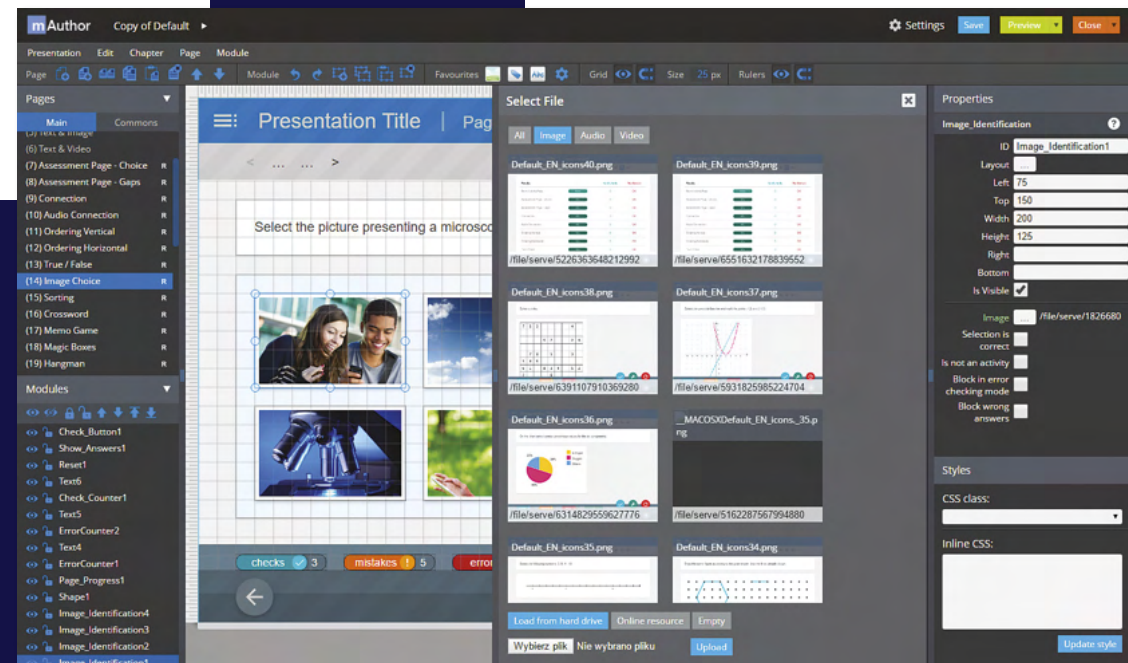

“At Porto Editora, we use mAuthor for creating premium rich interactive educational courses and aggregate digital resources. We have chosen this tool because it has a very good cost/benefit relation and its potential is huge. Our staff has quickly learned how to develop their work with mAuthor and the support from Learnetic is really very good.”

Rui Pacheco
Multimedia Department Director at Porto Editora
/Portugal/

WYSIWYG Designing

In order to make it easier for new users to operate, mAuthor's WYSIWYG XML editor has been constructed along the widely accepted UX trends implemented in the majority of professional design applications.

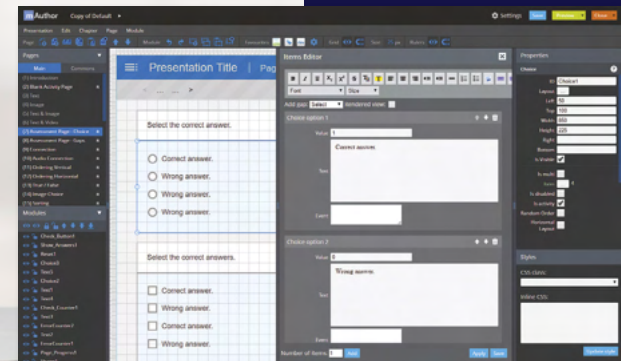

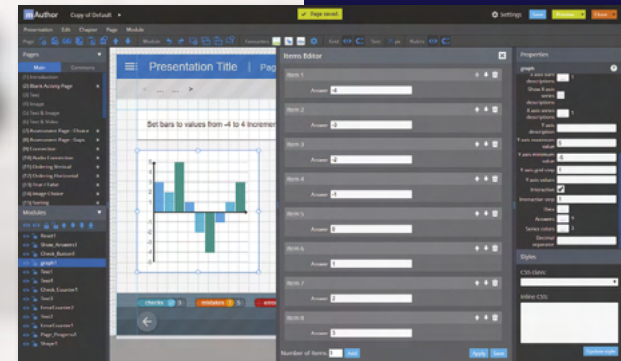

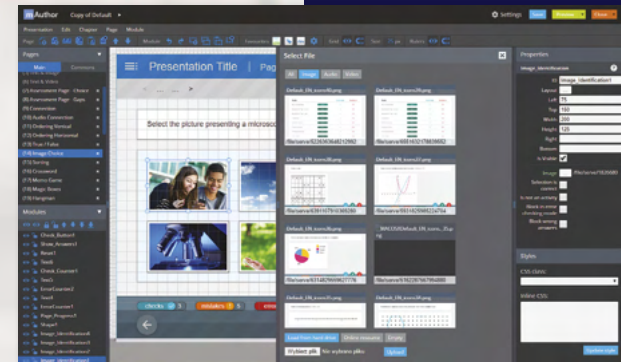

Such approach makes it quick and easy to start creating your own electronic content as the mAuthor's user interface concept is well known to most graphic artists and designers.

150+ Functional Modules

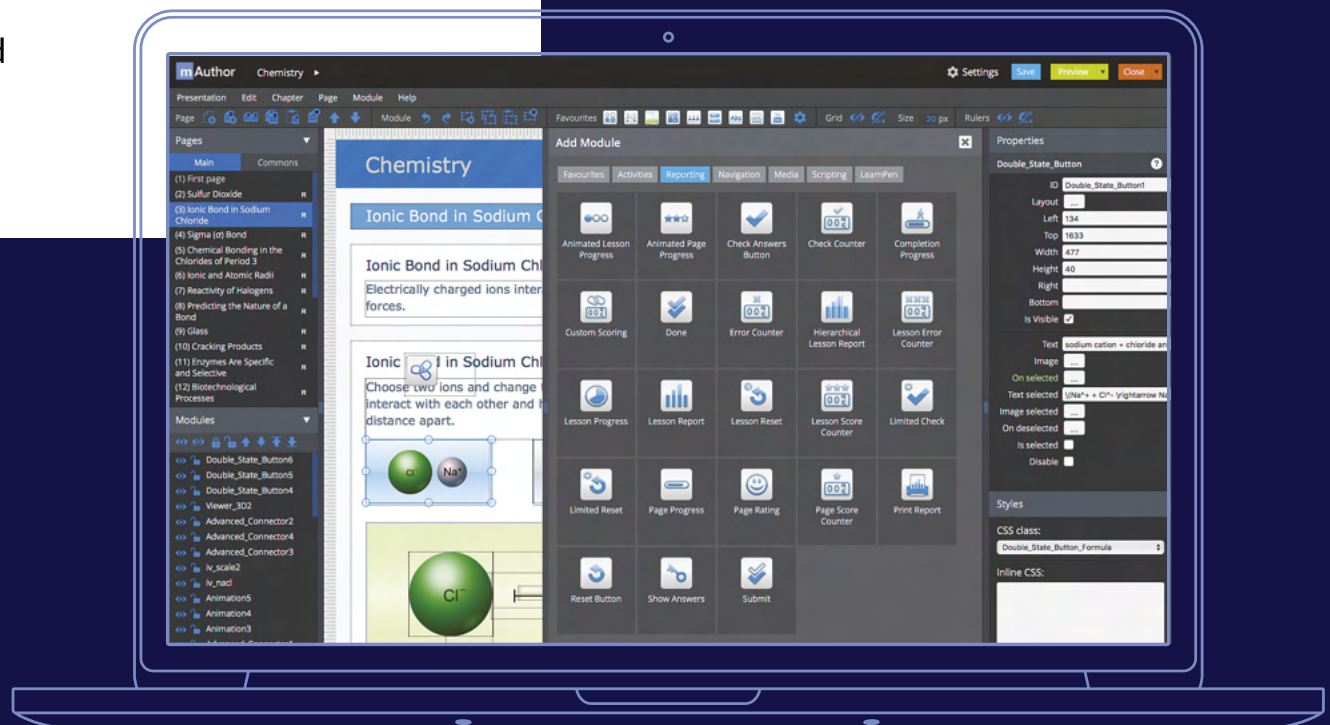

to address your
most demanding
eProjects

Modular architecture

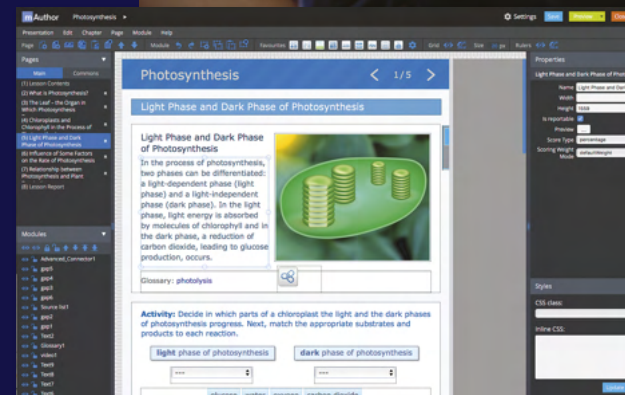

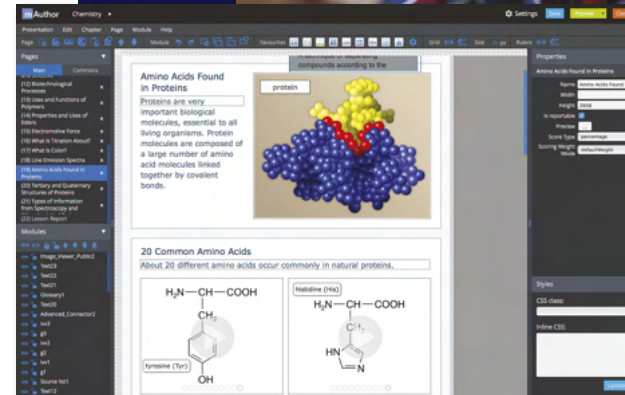

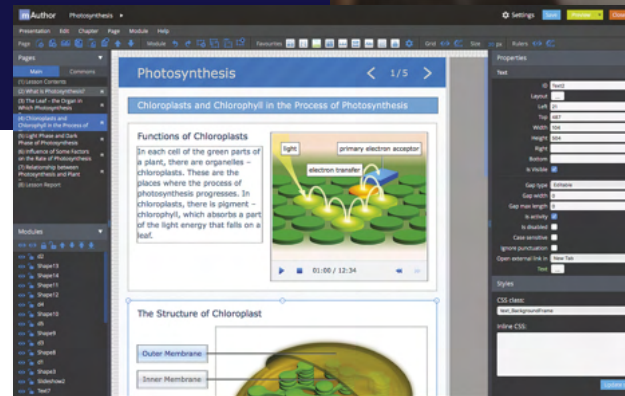

Thanks to mAuthor's modular architecture, highly interactive content can be built from a broad variety of functional blocks.

Each functional module can be precisely customized by adjusting a number of its **properties**, and thus making it truly responsive to various user's behaviour. A large number of less obvious functional modules should help you realize even the most advanced interactive exercises.

Media Modules

- 3D Viewer
- Animation
- Audio
- Audio Playlist
- Flashcards
- Image Viewer
- IWB Toolbar
- Lottie Player
- Media Recorder
- Slideshow
- Shape Tracing
- Text Audio
- Video
- YouTube
- Zoom Image

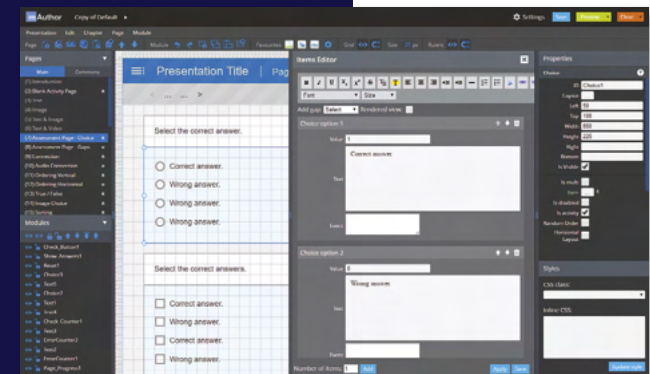

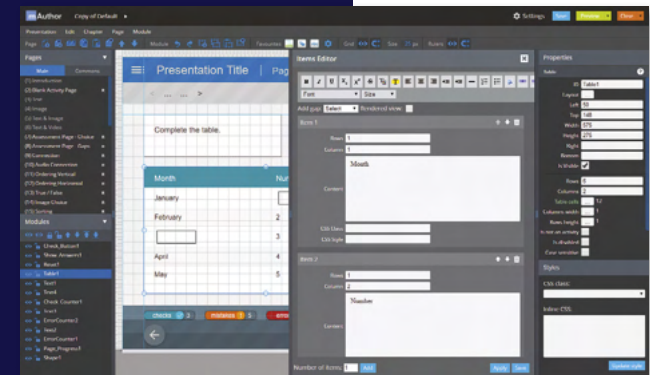

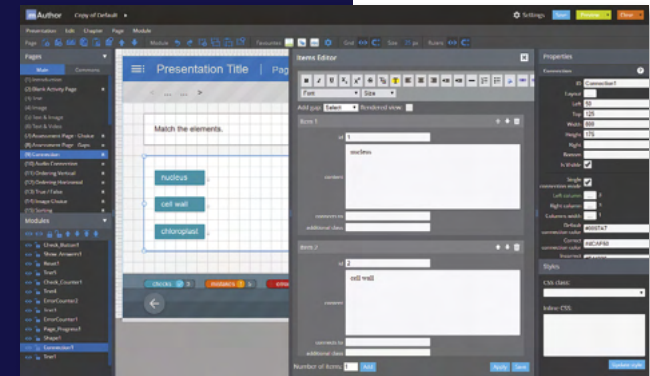

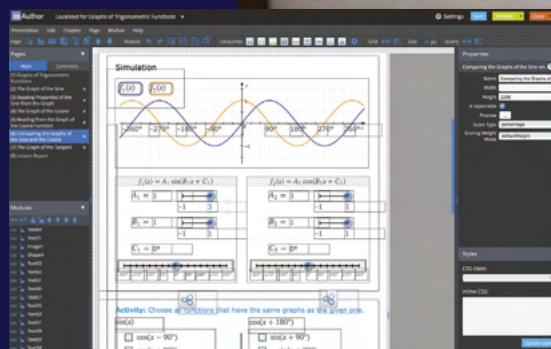

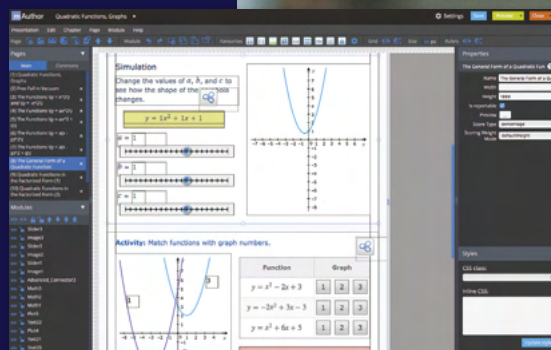

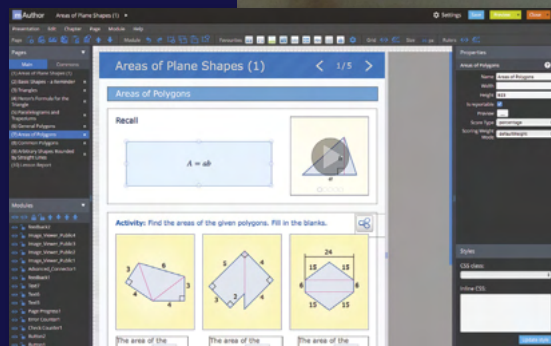

Activities

- Choice
- Connection
- Image gap
- Image Identification
- Multiple Gap
- Ordering
- Paragraph (open question)
- Text (with gaps)
- Text Coloring
- Text Identification
- Text Selection
- True/False

Advanced Modules

- Advanced Connector
- Blockly Code Editor
- Custom Scoring
- Feedback
- Grid Scene
- Programming Command Prompt
- Programmed Drawing
- Pseudo Code Console
- Timer

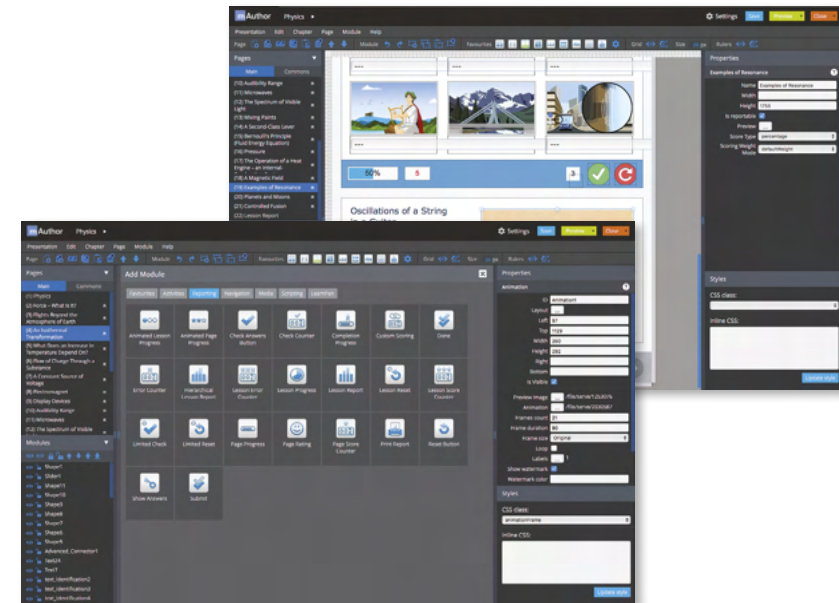

Math Modules

- Clock
- Count and Graph
- Figure Drawing
- Fractions
- Graph
- Math
- Number Line
- Pie Chart
- Plot
- Points and Lines
- Writing Calculations

Reporting

The majority of mAuthor's modules aggregate very **detailed information on the learners' activity**. Such information is used locally for giving **instant, valuable feedback** directly to a student, but is also collected to produce **the reports on achieved results** and indications of strong or weak abilities of a particular learner.

Besides the number of errors or a percentage result, a teacher or a trainer also knows the learner's exact answers, how many times student was trying to solve the activity, or whether a student asked for help.

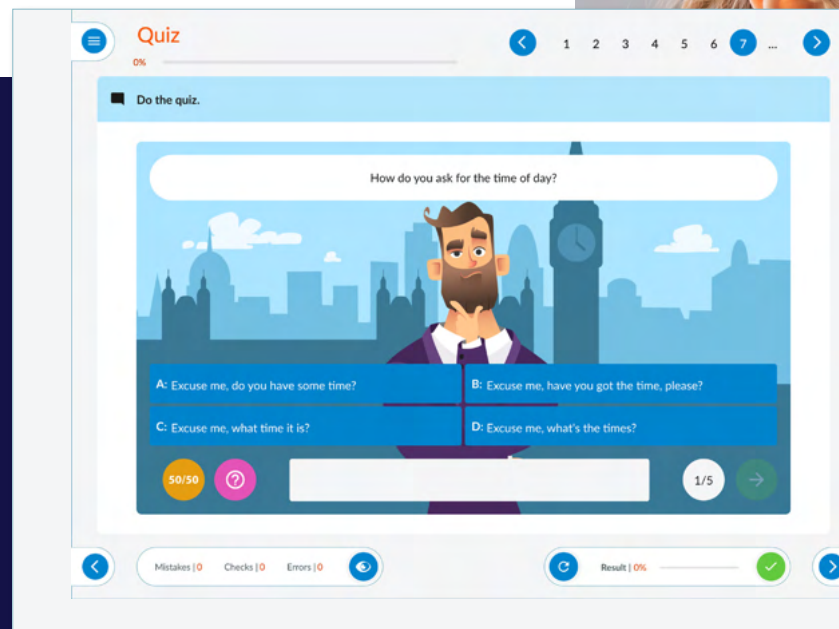

Reporting Modules

- Animated Lesson Progress
- Animated Page Progress
- Check Answers
- Completion Progress
- Hierarchical Lesson Report
- Lesson Progress
- Lesson Report
- Page Progress Panel
- Page Rating
- Show Answers

Gamification

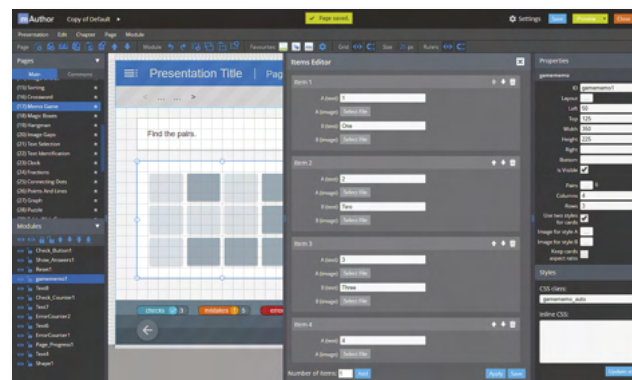

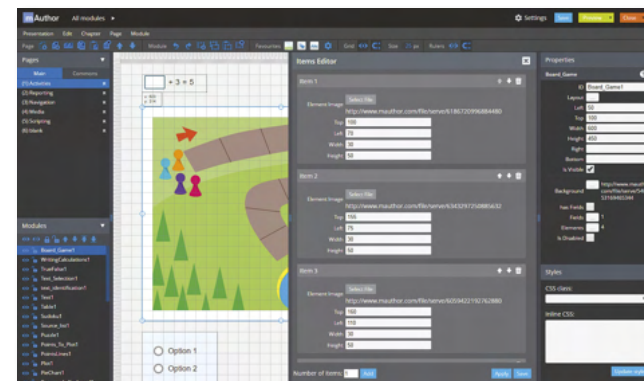

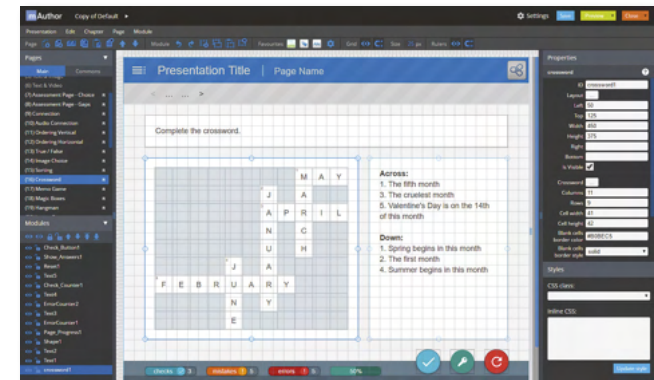

Using functional engines of **the edu games** modules, it is possible to design a number of attractive exercises. Loading of a local database of a selected game with a particular discipline content is needed to let the student play.

While solving the task a learner is asked to input some answers, discover hidden words, remember phrases or associate pictures with their descriptions.

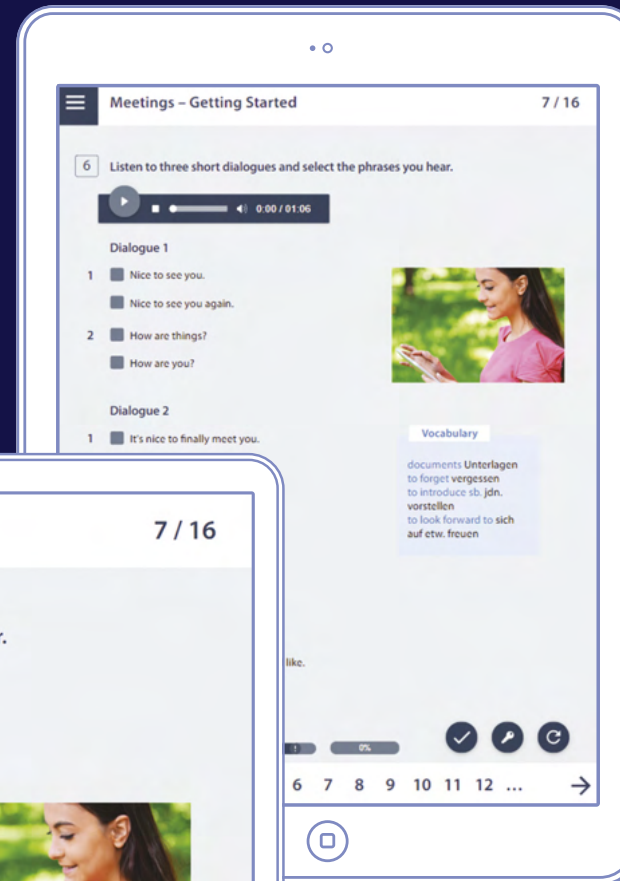

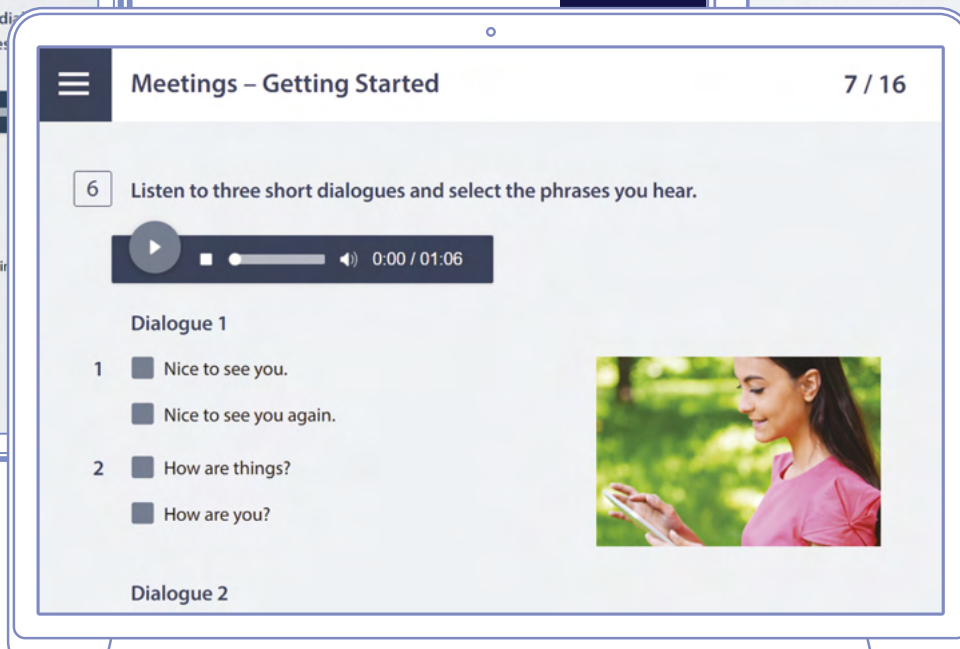

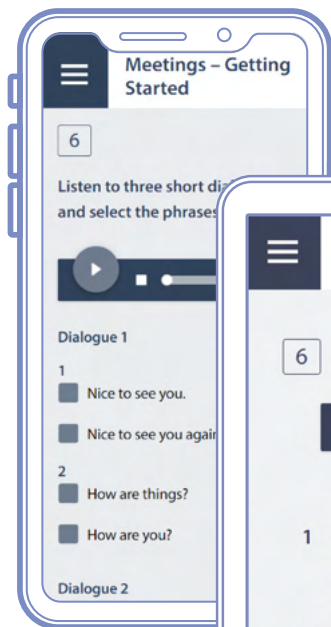

Game Modules

- Board Game
- Catch
- Coloring
- Connecting Dots
- Crossword
- Drawing
- Hangman
- Magic Boxes
- Maze
- Memo Game
- Puzzle
- Quiz (The Millionaires Quiz)
- Shooting Range
- Sudoku

Responsive Design Capabilities – full control over the layout

mAuthor feature allows creating lessons that display perfectly on various devices and screen sizes. It is based on an advanced set of functionalities that provide the ability to optimize the page layouts for display on computers, tablets, smartphones and much more. Furthermore, this feature allows to control over displaying the lesson in a vertical or horizontal screen orientation.

A man with a shaved head, wearing glasses and a green jacket over a white shirt, is sitting at a desk. He is smiling and looking towards the camera. In front of him is a large computer monitor. The background is a bright, out-of-focus office space with windows.

“At first we thought it is a bit difficult, but after a short training we got from Learnetic’s team we discovered its real power. We wouldn’t change it for any alternative.”

Kenan OGUZ
CEO at Unlimited Educational Services
/Turkey/

Ready-to-use Functional Templates

mAuthor offers several sets of ready-made templates carrying different visual designs, navigation styles and functionality.

You may use them to immediately start the creation of your digital content packages. You may also design your own templates to speed up the development team's work and keep consistency across the title.

eLearning Industry Standards

Electronic content generated by mAuthor is being built along the widely accepted eLearning industry standards. The created eCourses may be saved and exported as **HTML5, SCORM 1.2, SCORM 2004 or xAPI (Tin Cap API)** packages to any Learning Management System which supports these standards.

Semi-automatic PDF Conversion

mAuthor enables a semi-automatic conversion of print-ready PDF or InDesign XML materials into the mAuthor's native digital format. After the import, most texts and pictures get initial layout and need to be finetuned to match the electronic formats and extended with a relevant functionality.

Systems & Devices Agnostic

All data structures created by mAuthor are built and stored in **open XML format files**. At this stage the data is independent from the systems, platforms or devices it will be displayed on. Next, all such XML-based data is **dynamically interpreted by the interactive content player** that generates the HTML5 code responsible for its functionality and working on different operating systems or devices.

Interactive eContent Samples

Test and experience a vast collection of eContent samples with highly interactive activities, games, multimedia resources, educational films, animations & simulations, which have been developed with mAuthor.

Science

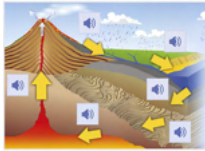

The Rock Cycle

The Rock Cycle

Rocks are constantly being broken down by weathering constantly being formed.

The Rock Cycle

Listen to the recordings and learn the stages of the rock cycle.

Activity: Label the stages of the rock cycle.

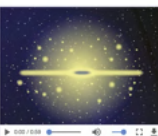

lift, erosion, deposition, melting, cooling, compression & burial, weathering

Galaxies < 2 / 6 >

The Milky Way

The Structure of the Galaxy

The Earth is a part of the Solar System, which has the Sun at its center. The Sun, together with a vast number of other stars, form a **galaxy**. The stars in our galaxy are not distributed evenly so, when we look at the night sky, we may see a band of stars called the **Milky Way**. Our galaxy is named for this band of stars and is called the **Milky Way Galaxy**.

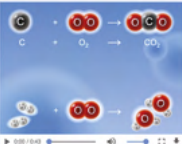

Activity: Label the parts of the Milky Way Galaxy.

location of the Sun, nucleus, spiral arms, global clusters, halo, disc

Chemical Equations < 7 / 8 >

Importance of Chemical Equations in the Work of a Chemist

Each atom has its own size and mass and these properties do not change during the course of a chemical reaction, so the total mass of the reactants is the same as the total mass of the products.

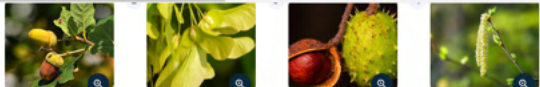

Activity: By heating 217 grams of mercury oxide, 201 grams of mercury were obtained. Calculate how much oxygen was produced by the decomposition of this oxide.

$$2HgO(s) \rightarrow 2Hg(l) + O_2(g)$$

Knowing that the total mass of the reactants equals the total mass of the products, modify the given equation to obtain the mathematical equation for the mass of oxygen obtained.

6. a jug of

Answer: Some would be great!

Greetings

1

Read these short dialogues. Which can you use with someone you know and which with someone you don't know?

someone you know
someone you don't know

It's a pleasure to meet you.

Greetings

Here are some key phrases from the video. Select the ones that are useful for you.

Getting started

Greeting someone you don't know

- ☐ You must be Ms. Kowalski.
- ☐ It's a pleasure to (finally) meet you.
- ☐ It's nice to meet you (too).
- ☐ Pleased to meet you.
- ☐ It's a pleasure to meet you.

Greetings / Introduction 9 / 16

8 Match the sentences and phrases which mean the same thing.

Let's get started.	How are you?
I'd like to introduce...	Please call me...
It's nice to see you again.	Great to see you.
How are things?	It's nice to meet you.
And I'm...	This is...
It's a pleasure to meet you.	Shall we start?

Powerful
Development
Platform
supporting

ePublishing
Processes

mAuthor is not just an authoring tool. It is a complete **Development Platform** to support and manage the ePublishing processes. It allows assigning different tasks to different roles, including: authors, instructional designers, editors, graphic designers, reviewers or testers. You can also create your own roles to customize the development environment to your specific needs.

mAuthor helps you to **control the development process** by observing the progress of different team members who can also communicate with each other and give feedbacks on the created materials.

Workflow Management

Thanks to mAuthor's control capabilities, the eContent development project can be organized according to **Kanban methodology**, a very popular workflow management system used mainly to support collective software development.

mAuthor's Kanban Board supports agile and lean development processes and may comprise many custom created columns in order to fit the workload of particular projects.

Version Control

eContent development projects usually involve participation of different team members contributing to a final digital product. It is of crucial importance to provide a **secure control system** to prevent loss of their valuable work. mAuthor is equipped with an advanced Version Control system, which takes care of your projects' integrity and consistence. No more mess with lost files or obsolete data.

The screenshot displays the mAuthor dashboard with a navigation bar at the top containing links for Home, Dashboard, My Lessons, Projects, Support, and Help. The main area features four large action buttons: 'Create New Lesson', 'Edit Last Lesson', 'Video Tutorials', and 'Take a Tour'. Below these, there are three sections: 'Recently edited lessons' (a table of lesson details), 'My project' (a table of project publications), and 'News' (a list of recent updates).

Cloud-based Software as a Service Model

A woman with dark hair, wearing a blue button-down shirt and a black headset, is smiling and looking at a computer monitor. She is sitting at a desk in a dimly lit office environment. The background is dark, and the lighting is focused on her and the desk. The text "Cloud-based Software as a Service Model" is overlaid on the left side of the image in a large, white, sans-serif font.

The mAuthor platform is offered in **Software as a Service** model (SaaS). Its highly reliable operation is secured by the deployment of cloud services from the world's top providers. It allows delivering not only an uninterrupted service but also provides necessary flexibility to scale-up the mAuthor service along with the growing needs of your development teams, hence gives instant access to any error patches or new functionalities.

Advanced Scripting

mAuthor is built as an open architecture application with an **external plugin interface**. In case you have very special needs, not supported by the mAuthor's existing modules, it is always possible to create a specific functionality using the **javascript-based** Advanced Connector module.

Such an approach gives you practically **unlimited freedom** to create projects that your subject matter experts or instructional designers consider as necessary to achieve their intended goals.

Open Source Player

The mAuthor's interactive content Player which is responsible for playing back the eContent and running it on different platforms and devices, is being designed as an **Open Source Code project**.

As a mAuthor user, you will find all necessary source code files and extensive documentation enabling you the integration of created eContent packages with your specific, proprietary platforms.

The background of the slide features a blurred photograph of a classroom. In the foreground, a young girl with dark hair is looking at a laptop screen with a slight smile. Behind her, another student is visible, also looking at a screen. The scene is brightly lit, suggesting a modern educational environment.

Adaptive Learning Paths

Thanks to a large quantity and variety of functional modules, mAuthor is the best positioned product to be used for projects aiming at highly interactive courses incorporating **Adaptive Learning** design.

It offers vast capabilities to dynamically build educational courses matching presented content based on the results of individual tasks, exercises or quizzes performed by a learner.

MATHEMATICS
 Properties of Exponents

Properties of Exponents

If a and b are real numbers and m and n are any integers, then:

- $a^n \times a^m = a^{n+m}$;
- $a^n \div a^m = a^{n-m}$, $a \neq 0$;
- $a^n \times b^n = (a \times b)^n$;
- $a^n \div b^n = (a \div b)^n$;
- $(a^n)^m = a^{n \times m}$.

Start

Additional exercises

Extension exercises

Report

MATHEMATICS
 Quadratic Function

Quadratic Function

A quadratic function is a function that can be represented in the form $y = ax^2 + bx + c$, where a , b and c are arbitrary real numbers with $a \neq 0$.

Indicate all the quadratic functions.

$y = 1 + 2x + 3x^2 - 2x - 1$

$y = (2 + x)^2$

$y = 2 - x - 3x^2$

$y = 3x + 1 - 2x + 1$

When a student starts working with an eContent package, the mAuthor's "adaptive engine" selects an appropriate path, offering exercises and presentations **tailored to the learner's current level of knowledge**.

This way, users who are less advanced in a subject get tasks and presentations that are easier to solve. Likewise, students with more knowledge get more challenging ones.

“We have made with mAuthor many successful solutions especially in Mathematics, Science, History and Social Sciences for primary and upper secondary levels.”

Juha-Pekka Heinonen
CEO Lasten Keskus ja Kirjapaja Oy
Edukustannus /Finland/

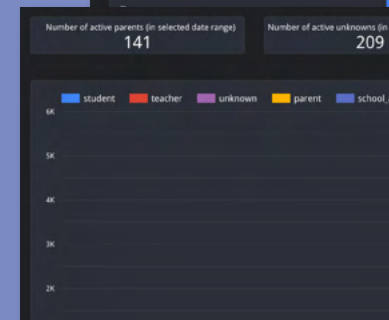

Big Data Analytics

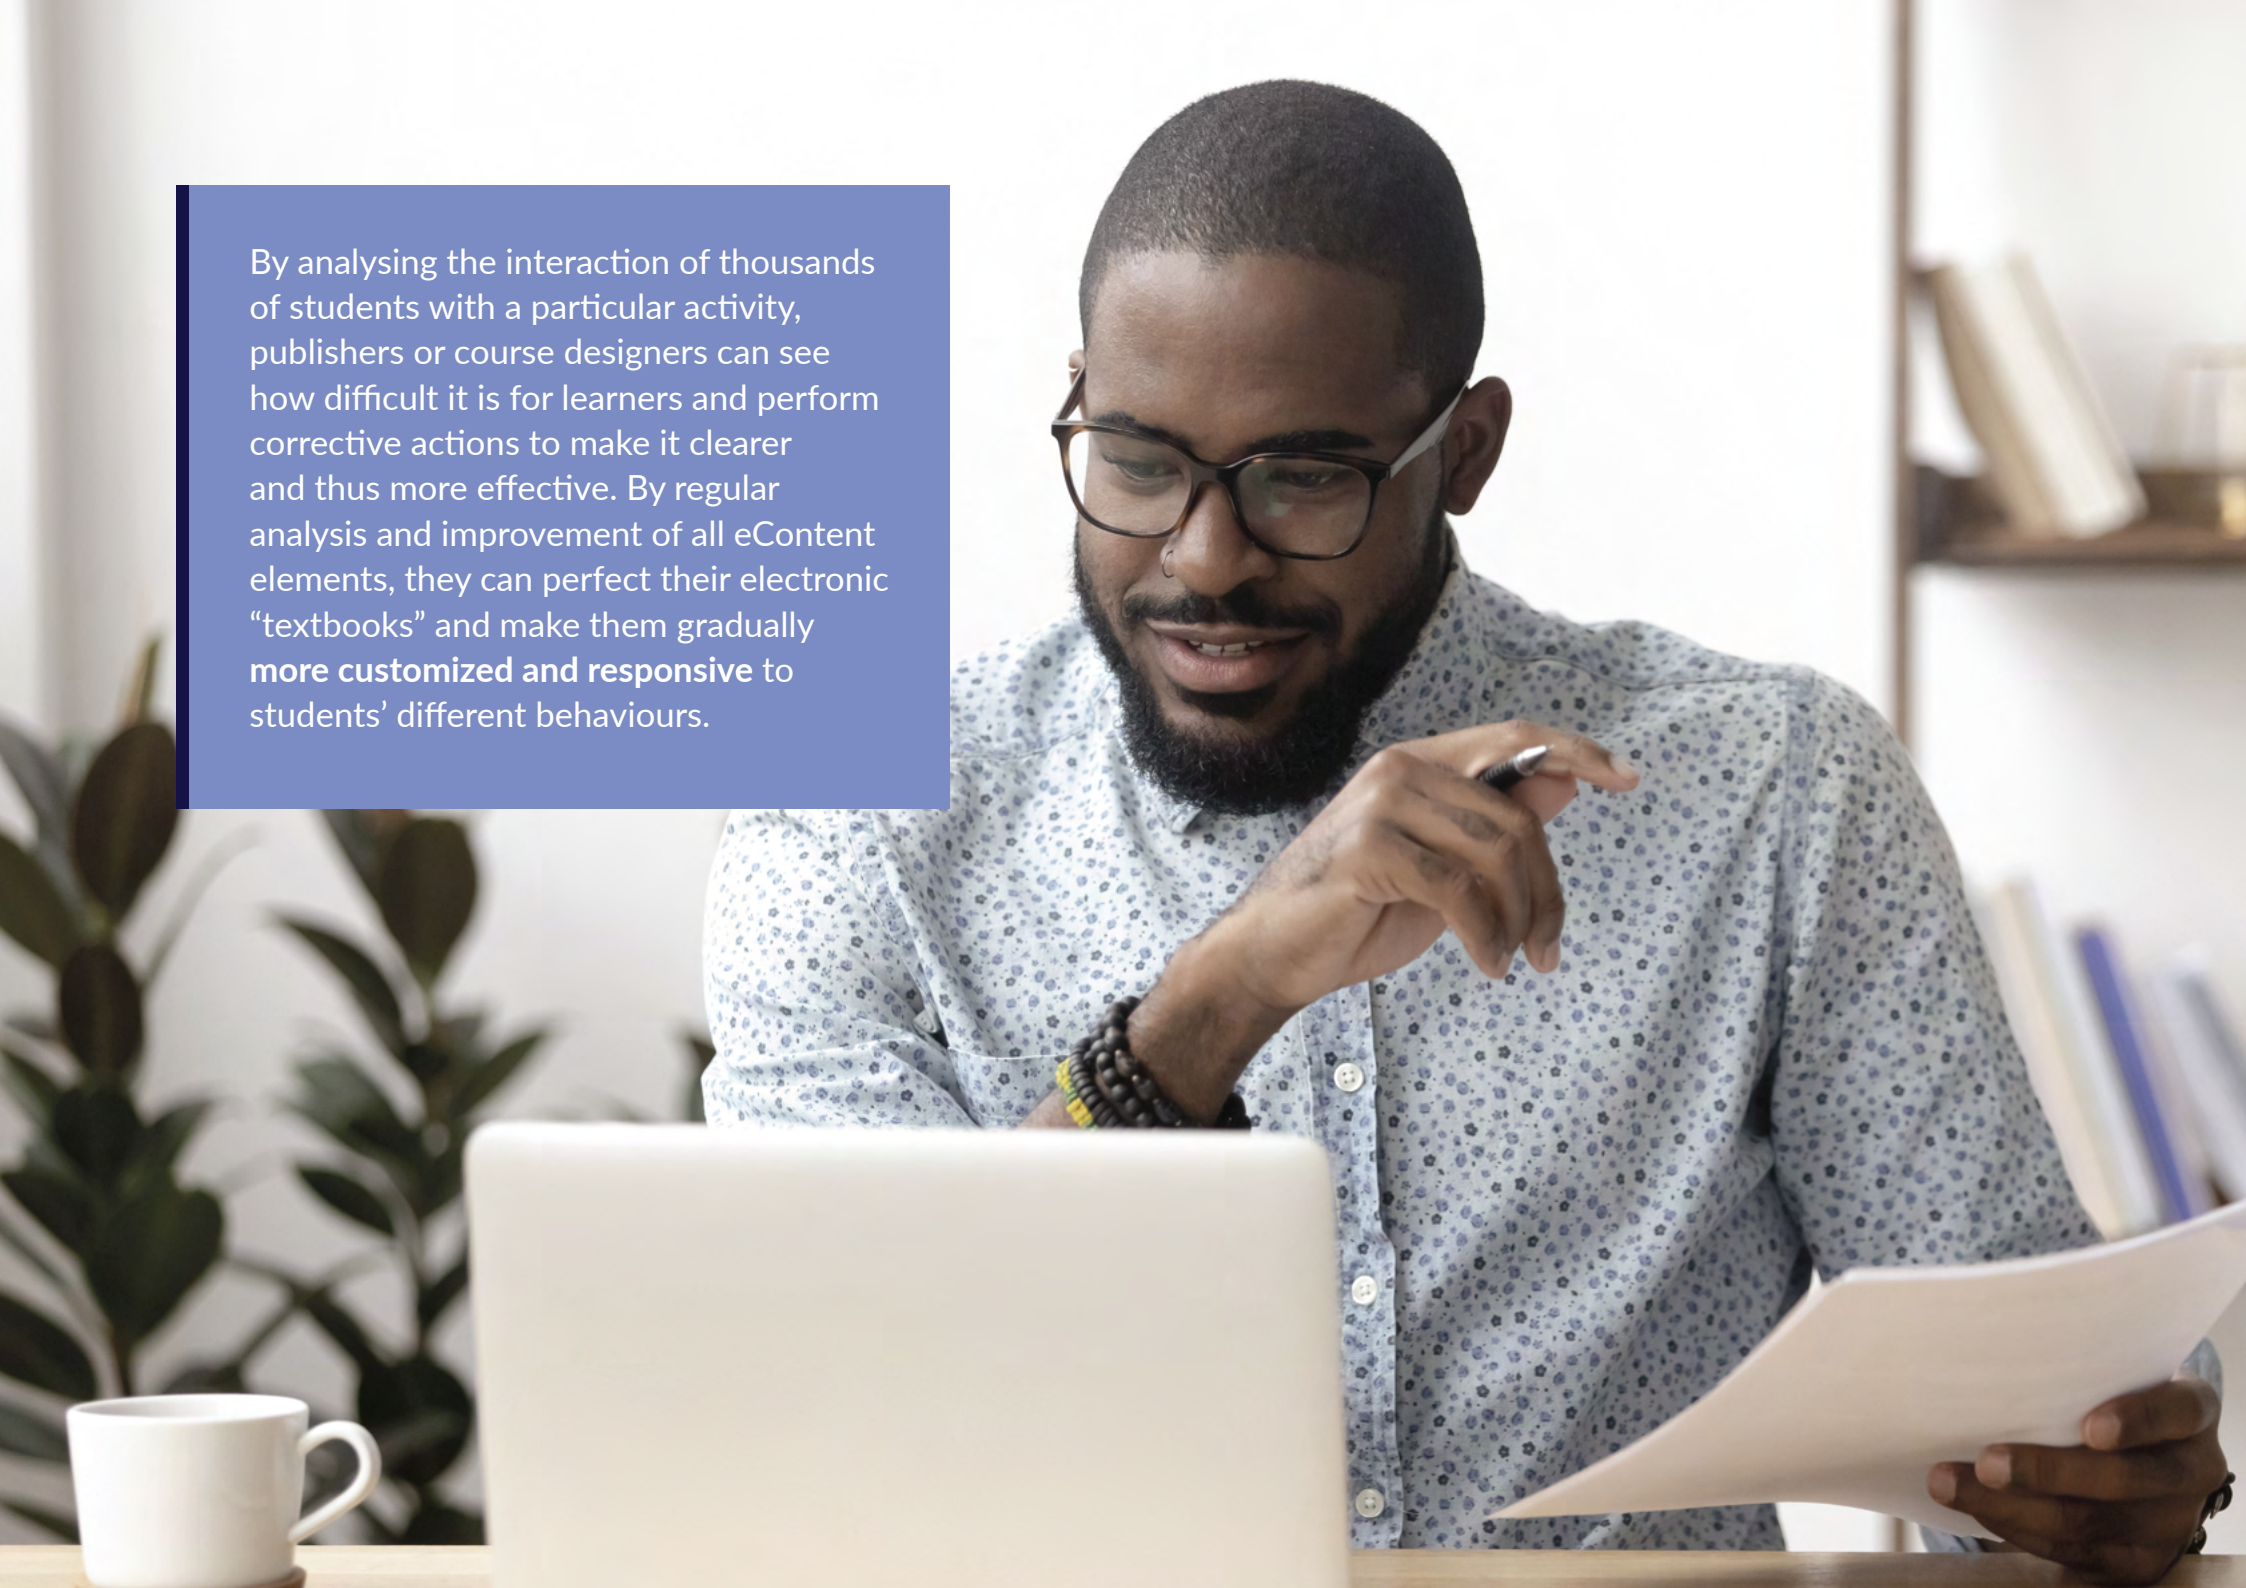

The eContent created with mAuthor is capable to generate a vast number of information concerning particular **learner's behavior** and especially his or her results obtained while solving interactive activities.

All such information is used to give instant feedback to the learner. However, it can also be collected in a general database which stores information of **all learners' results**.

All data generated by the mAuthor's eContent (deployed within the Learnetic's mCourser LMS) is stored in **Google BigQuery** database making it fully accessible by the variety of third party tools (like: Tableau, QlikView, DataHero, etc.) that enable publishers or trainers to perform thorough-full analysis and attractive visualisations of educationally relevant data.

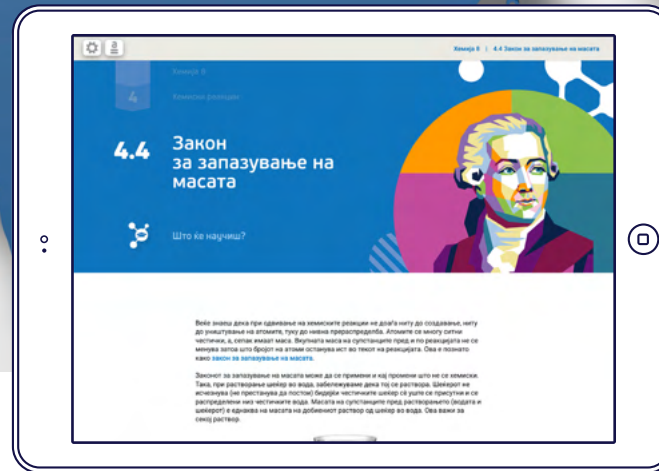

By analysing the interaction of thousands of students with a particular activity, publishers or course designers can see how difficult it is for learners and perform corrective actions to make it clearer and thus more effective. By regular analysis and improvement of all eContent elements, they can perfect their electronic “textbooks” and make them gradually **more customized and responsive** to students’ different behaviours.

Multilanguage Support

One of the challenges in making your eContent truly international or ready for localisation is to make sure it can handle non-Latin alphabets and writing styles. From the very beginning, mAuthor has been designed to support double-byte character sets (DBCS) which allows you to create content in practically any language.

Beside the possibility of exporting/importing XLIFF files, mAuthor also offers a dedicated **Translation Support Editor** which allows you to convert texts while observing the introduced changes directly in the activities that you are currently editing.

Chinese alphabet

Supporting Chinese language can be a challenge. Thanks to the DBCS standard, it is possible to handle a huge number of specific characters but it is also important to take care of specific layout of Chinese texts. Fortunately, with mAuthor's WYSIWYG editing mode the process of fine-tuning a complex layout is convenient and straightforward.

Cyrillic alphabet

Handling Cyrillic alphabet brings less technical challenges. With mAuthor you can export the texts embedded in the created eContent to the industry standard XLIFF file format and use the professional translating software. After the translations are done, you can import the files back and just take care of a proper layout of the translated texts.

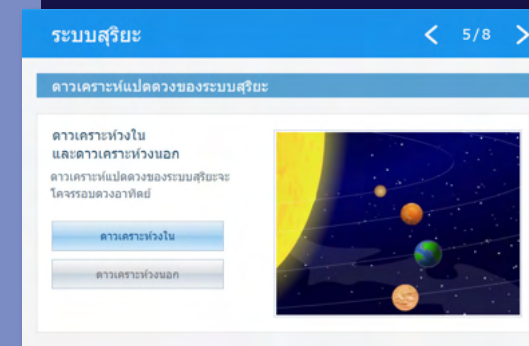

Arabic alphabet

As it comes to Arabic language, supporting DBCS standard is not enough. It was also necessary to implement a special functionality that allows writing in right-to-left mode. Thanks to this possibility, you may localize Latin-based materials or simply create new content without any problems.

Thai alphabet

Thanks to the capabilities mentioned above, handling other alphabets like: Thai, Hindi, Korean, Japanese or Hebrew makes no bigger problems. You always need to pay special attention to writing styles and traditions of particular language, but with mAuthor you can adjust its eContent to any such requirements.

eContent Development Process

Thanks to the fact that mAuthor is a cloud-based solution, it is possible to create **Project Teams** working together in different geographical locations.

Such a solution allows you to run the projects across different divisions of your company or even between companies from distant towns or countries.

Our in-house eContent Development Team is ready and happy to collaborate with publishers, subject matter experts or editors from your publishing departments.

Your Project Teams may observe the **work progress in real time** and give immediate feedback to our developers.

Moreover, by controlling all development processes, your project managers, publishers or reviewers can instantly introduce necessary changes or remove errors also by themselves, without any unnecessary delay.

START WITH A CONCEPT

You have an idea for your next digital course? Great. Before you start designing, prepare a detailed script and storyboards to turn your ideas into more specific concepts.

DEFINE A STRUCTURE

Having a good plan is crucial to your success. Prepare a structure of your next course. Use the mAuthor's hierarchy-tree builder to set the "Table of Contents" of your project.

BUILD INTERACTIVE PAGES

Start filling the structure with quality digital content. Coordinate the work of a project manager, graphic designers, subject matter experts, editors and publishers.

PREVIEW

Nice design and smart functionality need time and work. With the mAuthor WYSIWYG editor, your work is faster, more efficient and you can instantly preview the results.

EDIT AND REFINE

Check & improve, check & improve, check & ... Sometimes you may also get lost in this process. Fortunately, mAuthor takes care for Versions Control helping you to keep everything in order.

PROOF-CHECK AND REVIEW

Now it is time to check what others think about your work and let them give their input. Your rigorous correctors, proof checkers and testers will dig-deep to make sure that everything is working smoothly and errorless.

PUBLISH

And finally, "The Day" has come. Your digital course is ready to be published. Congratulations, with mAuthor your interactive eContent will astonish even the most demanding users – your students.

“We discovered mAuthor as a truly powerful solution for interactive educational content development. No other solution offers so wide spectrum of modules and activity types.”

Michael Chan
Senior BD Manager – NetDragon Websoft
/China/

Top Polish Developer 2019

Learnetic was recognized as a Top Polish Developer 2019 by Clutch, a B2B research platform.

Top Training Companies

Thanks to its extensive capabilities, mAuthor was distinguished by "Training Industry", one of the most influential online magazines concerning eLearning technologies. According to the magazine experts, Learnetic is among Top 20 Companies in the Authoring Tools category for the third consecutive year.

Bett Awards 2023 Finalist

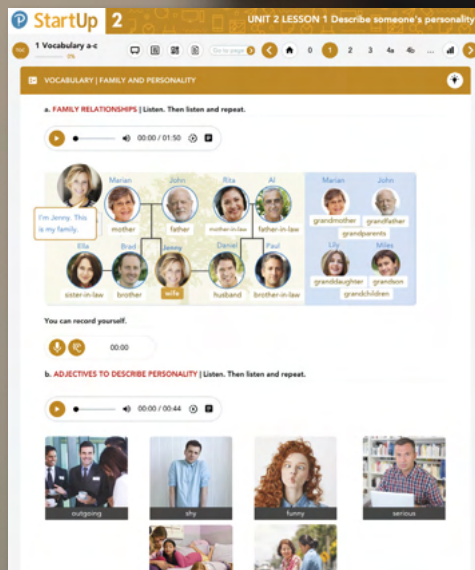

mAuthor was shortlisted for Bett Awards 2023 in the Transformational Impact category. Bett Awards Judges appreciate mAuthor's possibilities in creating WCAG-compliant, accessible educational materials, bridging educational gaps and helping people with special educational needs.

Accessibility & WCAG 2.1 Compliance

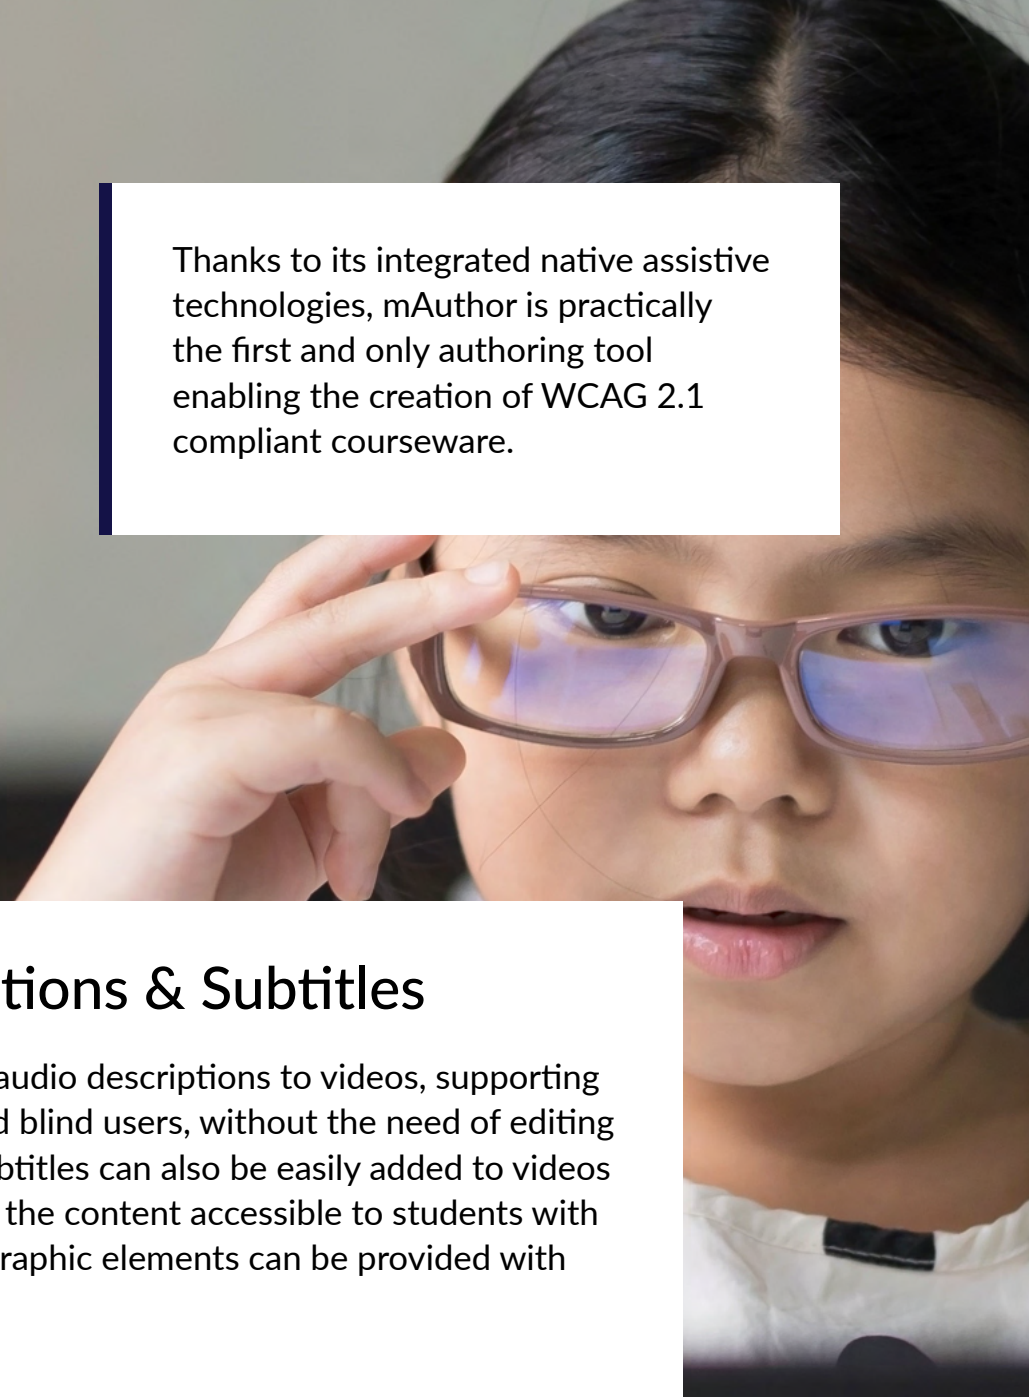

Highly interactive,
yet truly accessible
eContent

Thanks to its integrated native assistive technologies, mAuthor is practically the first and only authoring tool enabling the creation of WCAG 2.1 compliant courseware.

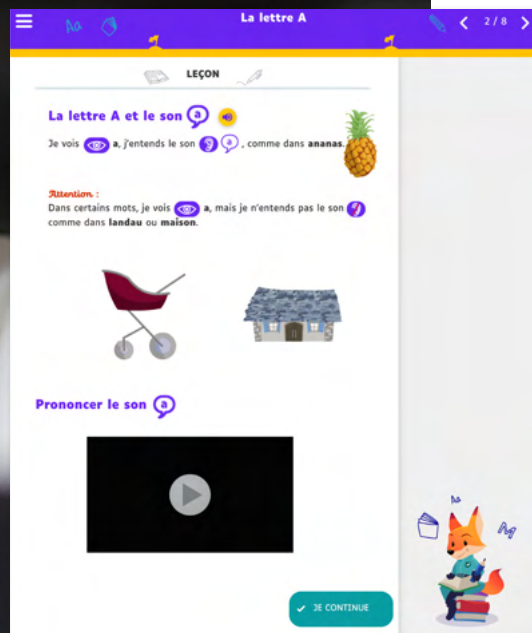

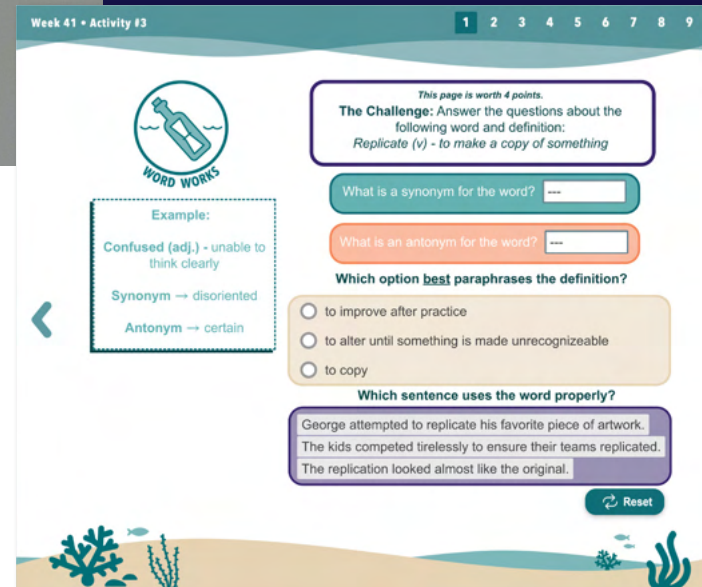

Audio Descriptions & Subtitles

mAuthor allows adding audio descriptions to videos, supporting the visually impaired and blind users, without the need of editing the ready video files. Subtitles can also be easily added to videos and slideshows to make the content accessible to students with hearing disabilities. All graphic elements can be provided with their text alternatives.

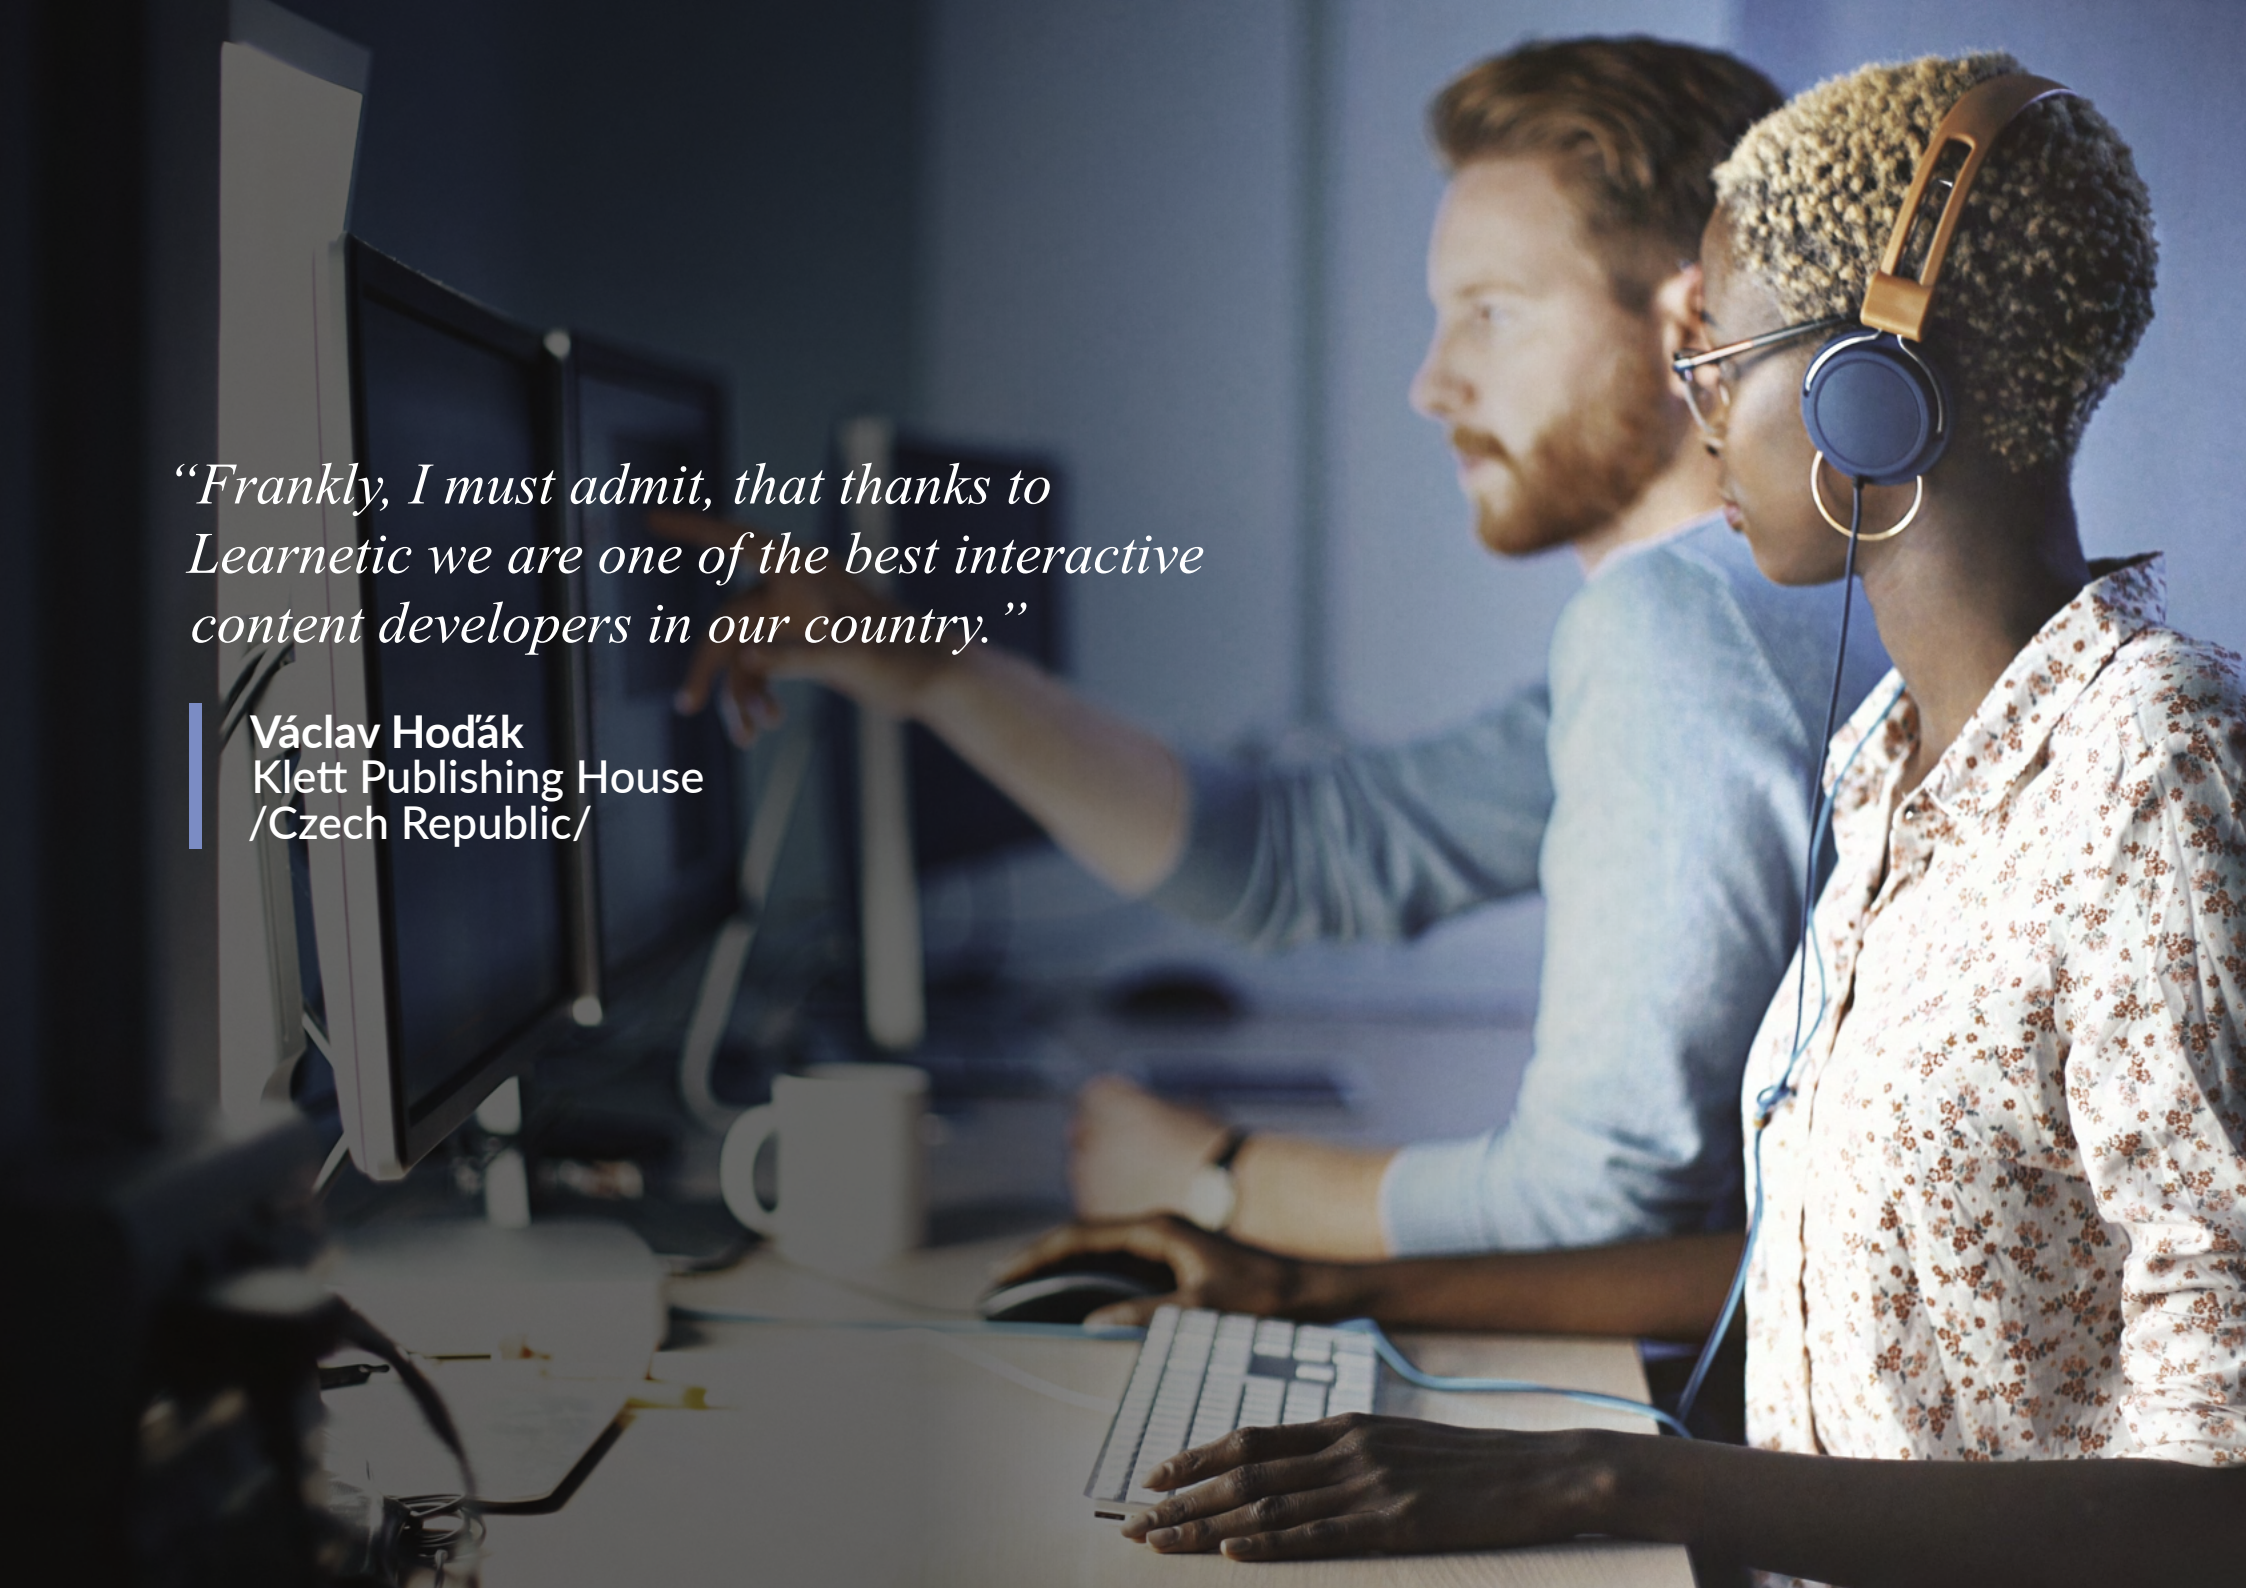

Screen Reading Technology

Besides the new options addressing the generic screen readers, mAuthor offers its own screen reading assistive technology integrated with the created content. This approach provides far better user experience and comfort in comparison with the generic screen readers. The solution offers a voice synthesis of alternative texts applied to the visual elements as well as multi-language and mathematical formula support.

Keyboard Navigation

mAuthor offers users to easily work with the content solely with the use of the keyboard. All the commonly used mAuthor modules support the keyboard accessibility. This allows students to navigate through the course, solve even the complex activities and check the results without using a mouse or touchscreen gestures.

A photograph of two people working at computers in a dimly lit office. In the foreground, a woman with short, curly hair is wearing large, over-ear headphones and a floral patterned shirt. She is looking at a computer monitor. In the background, a man with a beard and glasses is also working at a computer, gesturing with his hand. The scene is illuminated by the soft glow of the computer screens.

“Frankly, I must admit, that thanks to Learnetic we are one of the best interactive content developers in our country.”

Václav Hoďák
Klett Publishing House

Lines Tangent to a Circle

CRITIQUE & EXPLAIN

10-2 Lines Tangent to a Circle

I CAN... use properties of tangent lines to solve problems.

VOCABULARY

- point of tangency
- tangent to a circle

Common Core State

CRITIQUE & EXPLAIN

Alicia and Renaldo made conjectures about the lines that intersect a circle only once.

- Many lines intersect the circle once at the same point.
- Two lines that intersect the circle once and the segment connecting the points form an isosceles triangle.

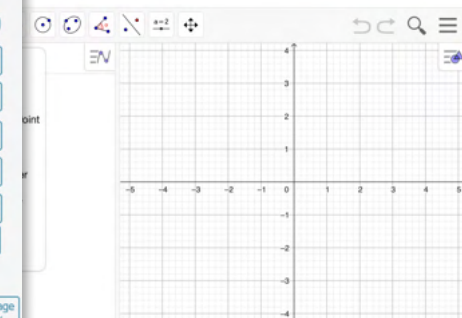

- Parallel lines intersect the circle at opposite ends of the same diameter.
- The lines intersecting the circle at one point are perpendicular to a diameter of the circle.

Conjectures do you agree with? Which do you disagree with? Draw sketches to support
