

mAuthor main features

MULTI-LANGUAGE SUPPORT

Discover one simple solution for creating multilingual eContent! Arabic, Chinese, Cyrillic, Thai, Hindi – mAuthor gives an option to create truly international materials adjusted for each language and alphabet. Translating even the complex layout is convenient and straightforward. Check offered functionalities and start publishing for learners from all over the world.

Create content in any language you wish!

1 MULTILINGUALISM IN MAUTHOR IS AN ENTIRELY DEVELOPED FUNCTIONALITY

It supports:

- non-Latin alphabets,
- writing scripts,
- double-byte character sets (DBCS),
- writing in the right-to-left mode,
- translating XLIFF file format

2 HOW DOES IT WORK IN PRACTICE?

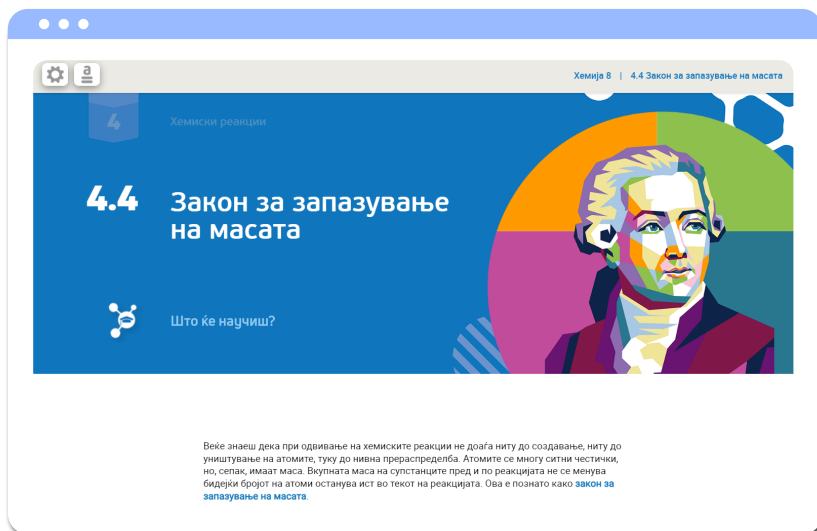

ARABIC ALPHABET

Besides the DBCS standard, an exceptional functionality is implemented that enables writing in the right-to-left mode. It allows to localize Latin-based materials or simply create the new eContent.

CHINESE ALPHABET

There are two mAuthor's features that allow easily creating eContent in Chinese. The first – **DBCS standard** allows handling a vast number of specific characters. The second – **WYSIWYG editing mode**, which makes convenient and straightforward creation of the particular layout of Chinese texts.

CYRILLIC ALPHABET

Using mAuthor you can export the texts from eContent to industry-standard **XLIFF file format** and use professional translating software. After the translation, import the files back and simply take care of the proper layout of the texts.

CURRENTLY THERE ARE KNOWN OVER 7,100 LANGUAGES SPOKEN BY PEOPLE AROUND THE WORLD.

CHECK OTHER FEATURES OF mAUTHOR:

- **ACCESSIBILITY & WCAG 2.1 COMPLIANCE**
